

Help the children of Nicaragua

Your support allows us to provide much needed medical and nutritional assistance to many families

For our fifth year of travel to Nicaragua, we are taking on even more than before. Not only will we be building a medical clinic in Chinandega, we will also be building a feeding center, adding onto a hospital and supporting the Mercado Project.

How you can help!!

We would not be able to continue our project without the support of everyone here. In addition to building these clinics and centers, we strive to supply medical and medical office equipment. These children need simple things such as any item you can find in a basic first aid kit. (Band-Aids, gauze, adhesive tape, compresses, etc.) They are also desperately in need of more professional equipment. (Stethoscopes, thermometers, nebulizers, syringes without needles attached, etc.) Some of you may have these items laying at home while others may have contacts in the medical field that can help.

Unfortunately we are not able to transport any medication or liquid products

We invite anyone who would like to travel with us but understand that many can not make that type of commitment. Those who are not able to travel with us are also welcome to join the group with donations of supplies and funds. As you can see on the faces of the kids and the community, Any help will always be appreciated.

Dates of Travel: **Saturday, March 13—Saturday, March 20**
